Available at a slight price premium. 

Colors shown are matched as accurately as possible, but may vary slightly from finished product. These rich and vibrant colors are produced with either Kynar 500® or Hylar 5000® resins, which provide superior color retention, and allow us to offer non-prorated coating warranties for most applications. Coating warranty varies for Regal Red, Matte Black, Copper, Silver, Champagne, and Pre-Weathered Galvalume. Metallics are warranted for chip, crack, and peel only. Please contact your representative for more information.

Stocked Item
Energy Star Compliant
LEED 2009 Compliant
ISR Initial Solar Reflectance
EMI Emissivity
SRI Solar Reflectance Index

* All metal is painted with a .20 mil primer and .70 - .90 mil Top Coat of 70% Kynar 500 or Hylar 5000. The reverse side has a .20 primer and .30 - .40 backer coating. 22 gauge steel available upon request.
- For low slope roofing to meet Energy Star requirements the ISR must be ≥ 0.65. After 3 years, the solar reflectance must be ≥ 0.50.
- For steep slope roofing to meet Energy Star requirements the ISR must be ≥ 0.25. After 3 years, the solar reflectance must be ≥ 0.15.
- For low slope roofing to meet LEED 2009 requirements the SRI must be ≥ 29. For steep slope roofing to meet LEED 2009 requirements the SRI for 100% of the roof must be ≥ 29.
- Low slope is defined as ≤ 2:12.
- Steep slope is defined as > 2:12.

Oil canning is an aesthetic issue and is an inherent part of light gauge cold formed metal products. By using coil that has been processed properly, designing for thermal movement, following stringent specifications for installation and proper handling most oil canning can be eliminated. Oil canning is not grounds for coil/panel rejection.
